The Plate Tectonics Revolution was the scientific and cultural change which developed from the acceptance of the plate tectonics theory. The event was a paradigm shift and scientific revolution. By 1966 most scientists in geology accepted the theory of plate tectonics. The root of this was Alfred Wegener's 1912 publication of his theory of continental drift, which was a controversy in the field through the 1950s. At that point scientists introduced new evidence in a new way, replacing the idea o
