Marc Halbrügge Predicting User Performance and Errors

Predicting User Performance and Learning in Human-Computer Interaction 25:23 This model provides some general implications for many interfaces, including that users will get faster with practice.

(PDF) Predicting User Performance and Learning in Human

We report a way to build a series of GOMS-like cognitive user models representing a range of performance at different stages of learning. We use a spreadsheet task across multiple sessions as an example task; it takes about 20--30 min. to perform.
