In this study, we have made an effort to develop a preservative-free and self-preserving liquid oral vation (approaches other than using preservatives) by taking Ashoka herb extract as a prototype.

### **Design and Development of Self-preserving and Preservative**

The principle of "Hurdle Technology" provides a scientific basis for developing preservative-free or self-preserving products. Adherence to principles of Good Manufacturing Practice (GMP), selection of appropriate packaging and type of formulation, low water activity, and high or low pH values are significant variables for the control of microbial growth in cosmetic formulations. Also ...

### **Natural Preservation from Concepts in Nature**

Being preservative free is definitely a challenge. The butters used to formulate most of the skin creams are fat based. If very little water is used to give it a creamy texture it can self preserve itself for a long time. Yes, the initial formulation takes time, but once it has been achieved it becomes easier.
